37° 10 ' N, Longitude 104° 45' W. Lat/Long of the individual  
outfalls is located in Table II-1.

**D. Facility Flows:** 2.1 MGD (3.2 cfs)

**III. PURPOSE OF MODIFICATION**

Administrative errors in the effective dates and corresponding compliance schedule deadlines for potentially dissolved copper, total recoverable iron, potentially dissolved selenium, potentially dissolved zinc, boron, chloride, EC, and SAR (including SAR pass/fail), where previously granted, were corrected. Effective limitation dates should correspond with the quarterly monitoring reporting periods applicable to this permit, but were inadvertently assigned during the middle of a reporting period.

#### **IV. CHANGES TO THE PERMIT**

The permit limitations that had an effective date of 08/01/2014 have been changed to an effective date of 10/1/2014, corresponding to the beginning of a calendar quarter.

Associated compliance schedule tasks that had a deadline of 07/31/2014 have been changed to a deadline of 09/30/2014 to incorporate this change.
